# ROAMBI JUMPSTART

**OVERVIEW** | Roambi was designed from the ground up for the mobile environment, and transforms data from popular business applications into interactive visualizations designed for, and instantly delivered to, the iPad and iPhone. Mobile users can view, analyze, interact with, modify and share their information – as well as store, manage and refresh their files – right

from the palms of their hands. The PipelineFX Roambi™ Jumpstart provides you with a quick and immediate way to get setup with Qube! external reporting on your iPad and iPhone. Designed to provide compelling charts and graphics of render farm data outside the network, Roambi Jumpstart will insure presentation-quality reporting in the shortest possible timeframe.

## BENEFITS

- o Monitor your render farm on iPad and iPhone while outside the network
- o Reduce risk by leveraging experienced consultants and proven best practices
- o Easy to schedule and delivered remotely

## DELIVERABLES

- o Setup of Roambi account and view creation
- o Google docs account setup
- o Report generator installation
- o Validation – Login and review from iPad and iPhone
- o Training – Basic chart usage overview

## REQUIREMENTS

- o Qube 6.0 with a running data warehouse
- o Google Docs account all set up
- o Any Roambi accounts created must be linked to a GoogleDoc account that will have access to the GoogleDocs folder where the report data will be stored.

## RESPONSIBILITIES

### **PipelineFX Qube! Certified Consultant (QCC):**

Coaches implementation, provides best practices knowledge about configuration, administration and basic troubleshooting.

### **Customer IT contact:**

Plans and coordinates Jumpstart-related IT functions and resources.

## PRICING AND SCOPE

- o 4 hours via telephone and GotoMeetingAssist
- o Maximum of two end user contacts
- o One user Roambi account included
- o PipelineFX Roambi Jumpstart delivered by QCC or QCA

Monitor your render pipeline from anywhere in the world with detailed, interactive reports
