

“I’ve been using Qube for a number of years now, and I can say that I know it quite well. But even for an administrator like me, I found the QCA training to be quite informative and a really good forum for picking up things that I missed in the past and discussing different ways of implementation and optimization. I would recommend the QCA to anybody who wants to start learning Qube and even to those who have already been using it for a while. I’m sure that you, like I did, will pick-up some new insight while you’re there! Thanks PipelineFX!”

CERTIFIED ADMINISTRATIVE TRAINING

PIPELINEFX is proud to offer certification training on Qube! render farm management software. The Qube! Certified Administrator (QCA) certification validates the ability to install, configure, manage, and troubleshoot render farms used in digital media production. The curriculum is designed for technical support staff, render pipeline engineers, Qube! reseller implementation and pre-sales engineers, IT consultants implementing Qube! for render farms, R&D engineers, render wranglers and IT personnel charged with deploying and/or managing a render farm. Training includes extensive hands-on lab time.
